SCIENCE & PHARMACY SERIES No. 38

JOSEPH SAMPSON

1828 GAMGEE

1886

Following on the researches of Dr. Matthias of Lausanne on absorbent dressings, Dr. Gamgee of Queen's Hospital, Birmingham, produced the well-known gauze tissue which bears his name. This was in 1880 and constituted a considerable advance on the methods then in use. Dr. Gamgee had a brilliant career, starting as a veterinary Surgeon, then taking up surgery and medicine with an interlude

whilst in charge of the hospital at Malta during the Crimean War.

### A Rich Background of Vitamin Experience

FOR twenty-nine years vitamin research has been a major project in the Parke-Davis Laboratories. Many significant developments, including the following, have come from this work.

The first procedure for biologically measuring the vitamin D potency of cod-liver oil.

The first officially recognised method of vitamin A assay, in which Parke-Davis research workers co-operated.

The first label statement of potencies of both vitamins A and D of cod-liver oil.

The first published recognition that vitamin B (as it was originally called) consisted of two or more components.

One of the first concentrated vitamin B preparations.

Introduction of high potency fish-liver oils—such as 'Haliverol'—which made administration of vitamins A and D much easier and more certain.

# A new and better MILTON NASAL SPRAY

¥ IMPROVED DESIGN OF FLASK

The steadily-extending acceptance of the Milton nasal spray putine against catarrh ensures a growing demand for this new version the Milton Spray. You may recommend it with confidence. If he routine is carefully practised and persisted in as described in the aflet of directions, lasting relief from catarrh can, in many cases, be obtained.

OOKES' HALIBUT LIVER OIL

Standard Parcels of Drops or

Capsules only

200ker's
Halibut Oil

Two Points

1. Winter is coming. Help us, and yourself, by ordering now above your immediate requirements.

2. Glass is still in short supply; we still have to use some war-time cartons for capsules. But apart from the 100-capsule packing, vial or carton, there is, at the moment, no other retail packing for Crookes' Halibut Oil capsules—and no cheaper rate. Any capsules so offered are spurious.

### TERMS OF SUPPLY.

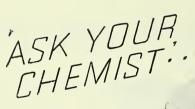

- 1. Bonus in kind will be allowed only when one or more standard parcels G, H, J, K, L, M are ordered.
- 2. The order must be accompanied by cash. No pro-forma invoices can be issued.
- 3. Orders for broken parcels or unaccompanied by cash will not be entitled to bonus in kind.
- 4. Bonus in kind cannot be allowed on any other Halibut Oil Products.
- 5. We must reserve the right to restrict the number of parcels supplied to any one establishment and thereby, as far as possible, ensure fair distribution.

One order in preference to a series of smaller ones, please!

# Yardley quotas

We are doing our best to ensure that your next Yardley quota will be with you approximately six months after the arrival of the last. Therefore, if you received your last quota this year during—

Jan. Feb. your next is due July Aug.

March April, your next is due Sept. Oct.

May June, your next is due Nov. Dec.

33 OLD BOND STREET LONDON

# Take the short cut:

This may well be Britain's hardest winter, from the food point of view. Nevertheless, no one need go short of fats and vitamins, because there is now plenty of home-produced SevenSeaS.

But supplies must be where the public can get them—in the shops. Last winter many dealers had to refuse custom because supplies had not reached them, though there was no shortage of the oil itself. Transport and manpower difficulties were to blame, and these are not likely to be greatly eased in the near future.

Take the short cut — via our Direct Delivery Service. That way, you get supplies with the minimum of delay. Orders are sent direct from our Hull refinery to you, and charged through your usual wholesaler.

### SevenSeaS advertising hascommenced

This widespread Press advertising campaign will continue throughout the winter months. These advertisements will remind the public that SevenSeaS—a far richer natural source of fats and vitamins than butter or new laid eggs—is the only unrationed priority food they will be able to buy this winter.

This advertising, plus the public's undoubted awareness of the great nutritive value of cod liver oil, is likely to start a very early demand for SevenSeaS. We urge you to order in good time. Please write direct to us for order forms.

STANDARD OIL:

Vitamin A 20,000 I.U.; Vitamin D 2,500 I.U. per ounce.

CONCENTRATED:

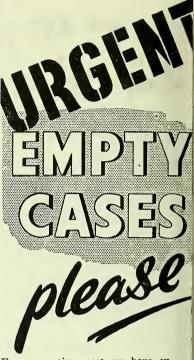

Vitamin A 60,000 I.U.; Vitamin D 6,000 I.U. per ounce,

Issued by
BRITISH COD LIVER OIL PRODUCERS (HULL) LTD.
ST. ANDREW'S DOCK, HULL

### TALKING IT OVER

### WHAT DO YOU WANT FROM THE PRODUCTS YOU SELL?

First . . . QUALITY? if you could read my post, you could not fail to be impressed, as I am, by the letters of thanks we receive from the public. We are proud to know that Koray Tablets are accepted as a standard for efficacy and purity. PROFIT? The profit available is standard on such merchandise. On

quantity orders, extra discounts increase profits, making Koray products as profitable to sell as any to-day. Attractively packed in display containers, they are counter lines which are handled with a minimum of trouble —easy to sell, clean, and requiring no breaking of bulk.

PUBLIC DEMAND? Hundreds of thousands of advertisements in the Press, as well as cinema films and posters in busy thorough fares and public vehicles, are telling the story of Koray everywhere, every day, and Koray is becoming one of the real leaders, if not the leader, of such merchandise in this country. We of the House of Koray believe that our product offers you the answer to your problems, and we invite you to ensure that your stocks are sufficient to meet the demand, which, already great, is still increasing.

I.S.M.A. I.A.M.A GENERAL SALES MANAGER KORAY LIMITED

P.S.—Although Koray is still in short supply, there are areas where we have vacancies for wholesalers. Retail chemists should write to us if they have any difficulty in obtaining supplies, giving the name and address of their usual wholesalers.

NOON

### 'QUINACRINE' & 'PRAEQUINE'

### . a new field

It was in the month after war broke out, October, 1939, that May & Baker, Ltd., applied for compulsory licences under the Pacents, etc. (Emergency) Act. 1939, to manufacture synthetic antimalarials.

It was a new field for M & B chemists, one which taxed their skill and staying power and one in which for a time M & B ploughed a lonely furrow.

'Quinacrine' and 'Praequine,' May & Baker's brands of mepacrine hydrochloride and of Pamaquin were first marketed in January, 1940.

This is not the time nor the place to tell the full story of the work that went on behind the scenes and that eventually resulted in output being increased thirtyfold.

We do not think that to make these simple facts known is to detract from efforts made by other firms in this country and in America in a similar direction.

Just as in 1914 M & B chemists produced 'Novarsenobillon' to fill an urgent need for a drug not hitherto produced here, so also in the present emergency M & B chemists were among the first to make the synthetic antimalarials available to the Armed Forces.

### WHY THE DEMAN FOR RHEUMAGIC

### is RISING

The War effort made additional demands on the Nation's strength. Those prone to Rheumatism, Lumbago, etc., require a reliable liniment to relieve suffering and enable them to carry on their work.

Rheumagic makes no claim to cure Rheumatism. Its purpose is to relieve pain. It does so speedily and in this way makes a contribution to the National effort. Rheumagic is bac'el by a guarantee of money bac f no relief.

Trade Report ...

nproved Telephone Services.—Since uary 1, the Post Office has provided an itional 2,000 trunk circuits, each more 1 25 miles in length, bringing the total ise to 10,700.

kamination Results ...

nited Nations Drug Control.—A proposal before the Preparatory Commission the United Nations, on October 12, ed control of the drug traffic under the e powers and functions as were possessed the League of Nations. The recommendativas approved.

rice-regulation Committee Appointments. he following appointments have been ounced to Regional Price-regulation unittees: Eastern Region, Mr. Ashley rum, chairman; North Midlands Republication of the sters, chairman; Mr. James Brown, etary.

ecture on Penicillin.—About 100 memof the South-eastern (London) Associas were present at a lecture, given on ober 2 by Mr. A. L. Bacharach, on nicillin." A vote of thanks was proposed by Mr. Paterson and seconded by Mr. Foster. The president (Mr. Archer) welcomed members from the Forces.

Explosion at Works.—One fatal casualty resulted from an unexplained explosion which occurred at the works of May & Baker, Ltd., Dagenham, on October 5. Another person was seriously injured and several others required treatment for minor injuries and shock. No fire resulted from the explosion, but the company's own medical rescue squad and fire brigade services were promptly at the scene of the accident, quickly followed by the N.F.S., the police, and public ambulances. An official inquiry is to be held.

German Dye Trust to be Seized.—A decision has been taken by the Co-ordinating Committee of the Allied Control Commission to Germany to seize and confiscate I.G. Farbenindustrie. Part of the 300 plants of the cartel will be dismantled and dispatched to one or other of the United Nations as reparations. Another part (that devoted entirely to war production) is to be

destroyed, and the remainder will be retained for peace-time production, mainly of pharmaceutical products.

Northern Ireland Examinations.—The winter examinations of the Pharmaceutical Society commence in the week beginning December 3, and not as previously stated. Entries should be received on or before November 3.

Eire Society's New Officers.—The officers of the Pharmaceutical Society of Ireland, 1945-46, have been elected, as follows: President, Mr. John Keoin Whelehan; Vice-president, Mr. Philip A. Brady; Treasurer, Mr. Patrick C. Cahill.

Glasgow Pharmacy Degrees.—The following candidates have been successful in the final examination for the degree of B.Sc. in Pharmacy at Glasgow University: A. M. Filippi and D. Macfarlane in pharmacy; D. Macfarlane in pharmacy;

Scarborough Delegation to Malton.—On October 3, a delegation from the Scarborough Branch of the Pharmaceutical Society visited Malton to hold a joint meeting with local pharmacists. Mr. H. M. Hirst (a member of the Society's Council) spoke on "Council Matters." Keen discussion followed, and a wish for further similar meetings was expressed.

Chesterfield Branch Meeting.—The annual meeting of the Chesterfield Branch of the Pharmaceutical Society was held on October 9, Mr. F. Elliott presiding. Mr. W. Swallow was elected Chairman. Messrs. S. C. Greaves, Secretary, and F. Simms, Treasurer, were re-elected. Mr. F. C. Wilson (a member of Council) gave an address on "General Topics," which was followed by a discussion. A collection for the Benevolent Fund realised £2 13s.

Presentation to Professor Todd.—At a reception held by the Glasgow and West of Scotland Blood Transfusion Service in the Royal Technical College, Glasgow, on October 13, a silver salver and cheque were presented to Professor James P. Todd, Ph.D., Ph.C. (professor of pharmacy), in recognition of his work as regional director of the Service, a post which he has now relinquished. The gifts were handed over, in presence of a company of over 200 persons, by Sir Alexander Macgregor (medical officer of health for Glasgow).

Manufacturer's Centenary.—A staff picnic to Blackpool signalised the centenary year of T. A. Ward., & Co., Ltd., manufacturing chemists, Exchange Street, Blackburn,

recently. The company was founded by a pharmacist at premises in Church Street, Blackburn. He and his partners were subsequently joined by the late Mr. T. A. Ward, from whom the company takes its name. In 1906 the concern was converted into a limited company. At the outing, the chairman of directors (Mr. Thomas Halliwell, M.P.S.) and the managing director (Mr. Robert Stephens) were present.

Birmingham Women Pharmacists.-The inaugural meeting of a Birmingham Branch of the National Association of Women Pharmacists was held on October 1. Miss Mozley-Stark (president of the Association) gave an address on "The Position of Professional Women in the World Today.' She stressed that women pharmacists have a place on hospital, after-care and nursery committees, and said it was important for them to get together, since II per cent. of the names on the pharmaceutical register and 52 per cent. of the students registered in 1945 were women. A vote of thanks was proposed by Miss Wotherspoon, and the following officers were elected: President Miss Durley; Treasurer, Mrs. Britton Secretary, Miss Pearson.

Walthamstow N.P.U. Branch.-The annual meeting of the Walthamstow Branch of the National Pharmaceutical Union was held on September 26. Mr. P. Willcocks vice-chairman, presided, and Mr. B. W. E Beard (a member of the Essex Pharmaceu tical Committee) gave an account of the recently held Conference of Pharmaceutica Committee delegates. Mr. W. E. Gaze giving his annual report as secretary reminded members that in June he had completed twenty-five years of office with the Association and N.P.U. Branch, and had also represented Walthamstow on the Pharmaceutical Committee for over twenty five years. Mr. J. T. James was elected Chairman and Mr. J. M. Wyness, Vice-chair man; Mr. W. E. Gaze was re-elected Secre tary, and Messrs. B. W. E. Beard and P Willcocks were appointed members of the Committee.

Manchester Refresher Course.—A refresher course in pharmaceutical subject is to commence in the chemistry theatre Room E17, College of Technology, Manchester, at 7.30 p.m., on Tuesday, Octobe 30. The course has been arranged by th Association and Branch, in conjunction with Mr. Henry Brindle (head of the pharmaceutical department, the University). Classes will be held weekly of Tuesday evenings throughout the session.

From October to January the subjects will be physiology and pharmacology, alternately. The latter part of the session will be devoted to sterilisation technique, with particular reference to the underlying bacteriology, and the preparation of sterile nedicaments. Pharmacists who wish to ake advantage of the course should attend the College of Technology on October 30; ee: £1 IIS. 6d.

Council Member's Address at Blackpool. An address on "Current Pharmaceutical Affairs" was given by Mr. W. J. Tristram a member of Council of the Pharmaceutical Society) to members of the Blackpool Branch recently. The chairman (Mr. A. R. sidebottom) reminded those present that he speaker was also a member of the National Pharmaceutical Union Executive. Mr. Tristram said that, although he had been a Council member for only two years, here had been rapid changes during his erm of office. The Council was now truly epresentative of pharmacy; territorially, very part of the country was represented. Half the members of the Council were in etail practice, with one hospital pharnacist, one manufacturer and one employee. Although there were divergences of opinion between the Society and the N.P.U., they worked well together on the Joint Comnittee. If numbers of health centres were et up, compensation would have to be given o redundant pharmacies if doctors were to e similarly compensated.

Optical Signs of Ill-health.—Birkenhead and Wirral Pharmacists' Association opened new session at Birkenhead on October 3, when Mr. R. J. Price, M.P.S., Rock Ferry, liscussed "Optics." Mr. W. R. Evason presided. The speaker described the anatbmy of the eye and iridiagnosis, a method by which the eyes could be examined to give an indication of health and disease. Various inorganic salts, he said, produced temporary or permanent markings in the ris, the chief being sodium chloride. This showed as "sodium chloride ring." Quinine produced a yellowish-green tint. Bismuth gave a dark grey broken circle in the digestive tract area of the iris; bromide a whitish blue crescent in cerebral area; reddish spots with white borders; sulphur a cloudy brown patch in digestive tract area. Mr. Price went on to deal with refraction and the importance of correcting astig-Members checked their own colour reactions. The lecturer was accorded wote of thanks by Mr. C. H. Crawshaw, seconded by Mr. F. Haworth.

N.H.S. Doubts, Fears and Assurances. At Edgware on October 1, a large audience heard the president of the Society (Mr. J. C. Young) speak on "The New Health Service in the Light of the General Election." A question that arose in Mr. Young's mind was whether the cost of the proposed National Health Service to the poorer section of the population would not be prohibitive. There was a danger, too, that service at health centres might exhibit the worst features of out-patients' departments at hospitals. It was unfortunate, in his view, that these new schemes, requiring much reorganisation in medical and pharmaceutical circles, should come along at a time when everyone was suffering from the strain of five years of war and feeling the need to relax rather than to intensify their efforts. Replying to questions, Mr. Young said employee representation in deputations to the Ministry of Health had been such as was included in the Council of the Society. He was unable to say whether employees would be free to choose their own representatives if the Ministry demanded a higher proportion of employees on such deputations. He did not believe that dispensing under N.H.S. would be done otherwise than by pharmacists.

Birmingham Analyst's Report.—The Birmingham city analyst reports that in the second quarter of 1945, 139 specimens of drugs were taken. Of these eleven were incorrect. A sample of calcium lactate tablets (gr. 5) contained an average of gr. 4.3; the variation was possibly due to absorption of moisture by the dried granules before compression or to separation. The makers now subject the finished tablets to analytical control. A sample of 'carbonate of soda' was found to consist of bicarbonate of soda. The retailers apparently did not know the difference. A sample of formalin tablets supplied in a paper bag was 38 per cent. deficient in formaldehyde. Two samples of health salts were not in accordance with the labels; some of the sodium bicarbonate had reacted with the acids present. Two samples of tincture of iodine were found to contain an excess both of iodine and potassium iodide, due chiefly to evaporation of the alcohol. As the proportion of iodide was greater than the iodine, apparently some of the iodine had also evaporated. A sample of compound liquorice powder contained only 42 per cent. instead of 50 per cent. of sucrose. A sample of raspberry vinegar contained only 23 per cent. sugar, instead of the usual 50 per cent..

### OFFICIAL ANNOUNCEMENTS

Telephone to Switzerland.—Telephone conversations with Switzerland (commercial only) are no longer restricted to English and French.

Overseas Trade Reviews.—The Department of Overseas Trade has published two new issues in its series of commercial reviews, begun in March; they are for Canada and Turkey, and are obtainable from H.M. Stationery Office. The reviews give an account of pre-war commercial conditions, describe changes that have occurred during the war, and discuss opportunities for selling United Kingdom goods.

Telegrams to Malaya.—The public telegraph service has been restored to all places in Malaya except Kedah, Kelantan, Trengganu and Brunei, and to Rangoon, Burma, Commercial telegrams are restricted to ascertaining facts or exchanging information and must be in plain English. Rate, 1s. 3d. per word; deferred telegrams, 7½d. per word. Letter telegrams are accepted at 10s. 5d. for twenty-five words and 5d. for

each additional word. Empire social tel grams (GLT) are accepted at the rate 5s. for thirteen words and 5d. for each additional word.

French-owned Bank Balances.-As pr liminary measures for giving effect provisions of the Anglo-French Proper Agreement signed on August 29 (Cm 6675), the Board of Trade has taken the following steps in regard to French assets the United Kingdom: Bank Balances n exceeding £500.—The Custodian of Ener Property is enabling bankers to reconstitut in favour of the original account holder accounts in sterling and quoted foreig currency of French persons. Register. Securities owned by individuals.—Authoriti have been issued for removing restriction imposed by Section 5 of the Trading wi the Enemy Act and Article 4 of the Cust dian Order in respect of any securiti registered or inscribed in the name of a individual resident in France in any regist (or equivalent record) kept in the Unite Kingdom, not being the register of a con pany incorporated outside the U.K.

### LEGAL REPORTS

Explosives Stolen by Schoolboys.—At Wimborne, Dorset, juvenile court, recently, eleven public schoolboys, of ages ranging from fourteen to sixteen, were bound over, with their parents, for twelve months in sums of £20 each, plus costs, on charges of stealing from an aerodrome equipment including explosives.

Theft from Pharmacy.—At Salford quarter sessions, on September 24, Harold Talbot, Charlotte Street, Broughton, Salford, was sentenced to eighteen months' imprisonment for breaking into a chemist's shop and stealing a box of atropine tablets, a box of hyoscine tablets and three bottles of medicine. To prevent the tablets from getting into the hands of juveniles, radio and Press notices were circulated indicating the dangerous nature of the tablets. The announcements were stated to have been instrumental in securing the arrest.

Window Damage During Election.—The story of rival Parliamentary candidates' election literature being posted on the window of a Belfast pharmacy was told at Belfast on September 24, when John Baird McCune, Ph.C., Duncairn Gardens, Belfast, was awarded £14 17s. compensation for malicious damage to the window. Applicant said that during the local Parliament-

ary election he found the window of h shop covered one morning with electic notices of the Unionist candidate. On the following morning he found the Unioni candidate's posters covered with the Labou candidate's literature. On the third mornir the whole posters were covered with much when the mud was cleared there was crack on the window.

Failure to Make Entries.—At Bourne mouth, recently, Henry W. Wain, M.P.S 71 Southbourne Road, and Eirwyn I Lewis, 275A Belle Vue Road, were di charged under the Probation of Offender Act, on payment of costs, on charges (failing to make entries in the Dangeror Drugs Register within the prescribed time Wain stated that the offence was du entirely to the fact that he had not had time since the illness of Lewis, who had bee away sick for three weeks, to attend t the matter. He had applied for anothe assistant but the Pharmaceutical Societ had been unable to supply one, and mos nights he was compelled to work unt midnight to keep the work under contro Lewis endorsed his employer's statemen and added that the amount of work the had been doing recently had contribute to his illness.

### **TOPICAL REFLECTIONS**

### .U. Executive at Work

our report of the latest monthly meeting the National Pharmaceutical Union cutive (p. 382) appeals to me as a typical ord of steady, methodical work essential the successful running of the business of pharmacy. Many of us are apt to e, occasionally, into a habit of asking it "it" has done to justify its existence it" being any institution to which we scribe. May I roughly summarise the ort mentioned? The agenda comprised: Finance; (2) National Health Insurance tters; (3) a resolution on the need for a y representative committee to conduct otiations for the proposed National rmaceutical Service; (4) applications loans from the Business Purchase and rantee Fund; (5) a report on repretations to Government departments, nd action arising therefrom," on four jects; (6) an application for revision of current National Joint Industrial incil agreement on wages; (7) two resoluis on closing hours; (8) a request for o in obtaining additional supplies of ds for the London area; (9) a report the War Distress Fund for Proprietor rmacists. Experience of such agenda ls me to conjecture that the words "Any er business" also appeared in this docuit. It is highly satisfactory to read that Business Purchase and Guarantee Fund loing well, and that the War Distress nd is regarded as sufficient to meet "any sonable claims." An examination of ilar reports for the past twelve months ild probably show that so long a list of jects for discussion and action is not eptional; even if it is, the difference is y in degree.

### New Convalescent Home

The decision of the Council of the Pharmatical Society to use Birdsgrove House, bourne, Derbyshire, as a convalescent ne for a trial period of three years (p. ;) is a welcome extension of the purposes its Benevolent Fund. The Council has, ely, rejected the idea of establishing what y be called a nursing home for "decayed" armacists: a venture of that kind would ve presented difficulties almost insuper-The subcommittee in charge of this ise will no doubt have its hands full. onvalescence" is a word susceptible of ious shades of meaning. It covers every t of the process of becoming well after ess, from the time a patient first crawls

out of bed unaided to that of the acquirement of zest for such sports as the tennis and golf available at Birdsgrove House. Some convalescent patients absorb a liberal supply of books of various kinds; others listlessly turn over the pages of illustrated magazines; to others, again, the sight of printed matter is abhorrent. The tempting of slowly returning appetite for food may well prove a difficulty at the outset; in this connexion the manager of a well-known restaurant told me recently that he thought it would be twelve months before he could offer anything like his pre-war variety. However, with a willing mind on both sides, these problems will not be very formidable. One point that does not appear to have been raised at the Council meeting referred to is the possibility of making the scheme self-supporting. While some of the guests may not be in a position to pay a fee covering the estimated cost of their stay, others may be able to offer something beyond that sum.

### Medicine and Literature

The resignation of Sir Walter Langdon-Brown from the Council of the Pharmaceutical Society (p. 372) will be widely Sir Walter has continued the regretted. long line of physicians of literary attainments, a line that includes illustrious names too well-known to need citation. months ago I was reading his "Thus We Are Men," a collection of essays and addresses published in 1938. Those of your readers who have not discovered this volume will be glad to know of it. In it they will find a considerable range of subjects, medical and other, treated with wisdom and charm. They will learn how a physician of experience interviews certain classes of patients in the consulting room, and may even learn how to recognise such people in The author's incidental the pharmacy. references to a variety of topics will suggest new trains of thought. In a brief mention of Sir Thomas Browne, for instance, there is a remark on his apprehension of "the chemical aspects of embryology." many writers with a literary background, Walter quotes frequently; but his quotations are never obtrusive and are invariably apt. One chapter ends with a passage from William James—endorsed, we may conclude, by the physician-author. Its last words are: "Be not afraid of life. Believe that life is worth living and your belief will help create the fact." Xrayser

Compulsory Winding-up.—In the Chancery Division on October 15, an order was made for compulsory winding-up of Prepac Chemicals, Ltd. Counsel for the petitioners said that they were judgment creditors for £200. There were no notices of opposition or support, and the company did not appear.

#### TRADE NOTES

Improved Spray.—Milton Antiseptic, Ltd., -12 Brewery Road, London, N.7, have roduced a new and improved design of Iton nasal spray. The new flask is easier clean, and the spray is non-clogging. An istration is to be found on another page.

Sulphathiazole Suspension.—Menley & mes, Ltd., manufacturing chemists, 119 ldharbour Lane, London, S.E.5, direct tention to their latest preparation Mickram sulphathiazole suspension, 20 per cent. 1e preparation is issued in 25-c.c. conners and is not subject to purchase tax.

Short-term Bonuses.—A discount of 10 r cent is allowed on £2 parcels of Pineeum brand preparations by the sole stributors for Great Britain and Northern eland, Chesebrough Manufacturing Co., d., Victoria Road, Willesden, London, W.10. [Corrected note.]

Five-day Week.—Glaxo Laboratories, d., Greenford, Middlesex, are operating a re-day week at their offices, laboratories in manufacturing plants. Only matters quiring urgent attention are dealt with—

7 an emergency staff—on Saturday ornings.

Tablets for Nasal Treatment.—Rona aboratories, Ltd., 159 Finchley Road, ondon, N.W.3, announce that Deltamin blets, which are presented as a compleentary treatment to Argotone nasal drops colds, catarrh, asthma and sinusitis, are vailable either direct or through the usual ade channels.

Progress After Fire.—Evans Sons Lescher Webb, Ltd., Speke, Liverpool, 19, state at they have made considerable progress reconstruction after a recent fire and cplosion at the Evans Biological Institute, uncorn. Most of the preparations are in roduction again, and it is expected that full range will be available shortly.

Anti-cold Capsules.—Charles F. Thackray, td., the Old Medical School, Park Street, eeds, I, sole distributors for Southon aboratories, Ltd., London, S.W.15, invite rders and inquiries for Esobactulin capsules or the prevention of colds. The capsules ontain specific antigens, immune globulins, nd vitamins A, B and D.

Hot-water Bottles.—Reliance Rubber Co., td., Cremorne Works, Lots Road, Chelsea, ondon, S.W.1, announce that they have vercome technical difficulties in the use of ynthetic rubber in the manufacture of

hot-water bottles, and have produced red and coloured models which meet the company's own exacting standards, laid down during fifty-five years as producers of vulcanised rubberware.

DDT in Moth-proofing Preparations.—R. Demuth, Ltd., Mavins Court, Greenhill Road, Farnham, Surrey, point out that DDT is not in itself an adequate moth-proofing agent. The moth cycle includes the egg, larva, pupa and adult moth stages, and DDT is active against larva and adult moth. The company's product, Pomp, contains DDT in addition to other substances which attack the moth at every point in the life cycle.

Redesigned Bottle.—Optrex, Ltd., Wadsworth Road, Perivale, Middlesex, announce that Famel syrup is being sold in bottles of a new design which are more convenient to use. In addition, a new 4-oz. size is being introduced to supersede the present 2½-oz. bottle, and the discount to retailers was raised from 20 to 25 per cent. on October 1. Full details of terms will be found in the company's advertisement elsewhere in this issue.

Nasal Congestion Preventive.—A new synthetic vasoconstrictor, Privine, has been introduced by Ciba, Ltd., The Laboratories, Horsham, Sussex. The preparation belongs to a group of imidazoline derivatives, of which Privine has been shown to be the most suitable for producing local anæmia and decongestion of the nasal mucous membrane. The preparation is available at full strength in bottles of ½ and 4 fl. oz., and at half strength (1 in 2,000) in bottles of the same sizes.

Again Available.—Supplies of Synkavit, described as a vitamin K analogue, are again available from the makers, Roche Products, Ltd., Welwyn Garden City, Herts, in 1-c.c. ampoules of 10 mgm., in packings of six and fifty, and in 10-mgm. tablets, presented in 20's, 100's and (for dispensing) 500's.—Sandoz Products announce that supplies of Neo-Femergin ampoules, tablets and solution are again available in adequate supply through the distributors, Brooks & Warburton, Ltd., 232 Vauxhall Bridge Road, London, S.W.I.

Scientific Films Graded.—The Association of Scientific Workers, Hanover House, 75 High Holborn, London, W.C.1, has issued a "graded list of scientific films," prepared

by its scientific films committee after viewing and appraising a large number of films for their scientific content. Entries are keyed under such headings as class, form and merit. The list is offered for sale at 2s. 6d. per copy.

Preparations Containing DDT.—Orders for delivery in rotation of Super Secto DDT preparations, powder and liquid, are being booked by the makers, Cupal, Ltd., manufacturing chemists, Blackburn. The liquid is in three sizes and the powder in two, at the usual profit margins offered by the company.—Leda Chemicals, Ltd., 94 Archway Road, London, N.19, have put on the market Leda DDT insecticide, containing 7 per cent. DDT-Geigy in an inertall-purpose base. The product is claimed to be suitable for household and horticultural use.—Watford Chemical Co., Ltd., 50 Baker Street, London, W.I, offer the following preparations containing DDT: Spray, in 1-pint bottles and 1-, 5- and 10-gall. tins; spray-powder, in ½-lb., 1-lb. and bulk containers (concentrated for preparation of horticultural sprays); and compound dusting-powder, in 1-oz. sprinkler-topped and 6-oz. cartons (for general household purposes).

#### Proprietary Articles Trade Association

Additions to Protected List.—Campbell Laboratories. Cloister herbal tea, 4s. doz., tax 8d. doz., inclusive retail price, 7d.; 12s. doz., tax 2s. doz., i.r.p. 1s. 8d.

Alterations.— Newton, Chambers & Co., Ltd., Izal powder, small drums, perforated lids, 8d., 6s. doz.; large drums, 1s., 9s. doz. (exempt from tax).

STAFF DINNER .- Guest of honour at the fourth annual dinner and dance given to the staff of Ashley & Weeks, Ltd., manufacturing chemists, London, S.W.17, was Mr. Vernon S. Porter (S. Maw, Son & Sons, Ltd., New Barnet), who congratulated those present on the team spirit that had enabled the company to establish its products in record time though under difficult conditions.

#### **BUSINESS CHANGES**

A RECOMMENDATION is made by Board of Trade, following representat that a number of traders in Northern Irel and elsewhere are having difficulty in tacting former suppliers who have chan their address for war-time reasons, that s concerns should assist old customers making their new addresses known to the hadden

#### ESSENTIAL OILS CONTROL

THE following circular (No. 18) relating to the operation of the Essential Oils Control has been issued by Whinney, Smith & Whinney (secretaries to the Control),

London, E.C.2:-

Inward Shipments.—In view of the revised conditions relating to the holding of delayed allocation stocks to which reference is made in Circular 16, the secretaries may be unable to arrange for a datum period distributor to take over oil, as provided for in Circular 10, paragraph 3, and the obligation imposed upon the secretaries therein must be withdrawn. In these circumstances it may be necessary for approved representatives to make arrangements to hold the oil pending allocation instructions. To facilitate the prompt allocation of consignments, the Advisory Committee again draws the attention of approved representatives to the importance of Circular 17, paragraph 1. If the required particulars are not in the hands of the secretaries fourteen days before the date of the arrival of the steamer, the Advisory Committee reserves the right to withhold payment of delayed allocation claims. Approved representatives are advised to obtain by air mail from their shippers a pro forma invoice with the detailed weights

of each package, prior to shipment.

Averaging of Prices.—As purchases of certain oils have been made at varying prices, the Advisory Committee has decided, where desirable, to average the cost prices each time an allocation is made, in order that all recipients shall receive deliveries at the same basic price. The method of procedure will be for Allocations Control to instruct A.R.s to distribute their importation on the basis of a price that may be higher or lower than their cost price. The invoice in these cases will be made up to the basis of the specified price with all calculations thereon based on that price. They will then return to the secretaries a copy of each invoice to the D.P.D.s, together with a corresponding statement based on the actual import price and built up in accordance with Clause 12 of the Scheme. The difference between the two calculations will be for the account of Allocations Control. D.P.D.s holding delayed allocation stock who receive instructions to issue this stock at prices differing from the cost to them must account in a similar way to the

Control.

Do It Now .- An all-out effort is needed now to salvage every scrap of paper.

#### A CHEMICAL WORKS IN THE ARGENTINE

The Buenos Aires factory of Chemotecnica-Sintyal S.A., Buenos Aires.

1. Board room. 2. Exterior of the factory. 3. Disinfectant plant. 4. The company's analytical laboratory Mr. Lazaro Tcherniak, the vice-president of the company, who is on a visit to this country, states: "Manufacturers and importers in the Argentine hope that no time will be lost in developing Anglo-Argentine trading relations to the full. South American countries are anxiously awaiting British goods, but in the past six years Argentine has become partly industrialised, and American manufacturers are taking a much greater interest in its possibilities. Many manufacturers are interested in importing raw materials, finished and semi-finished medical, pharmaceutical and veterinary products, particularly those which embody recent scientific developments, and the establishment of working arrangements between English and Argentine manufacturers, under which the latter can carry out partial or total manufacture of British specialities and branded goods.'

#### FURTHER TAX-FREE "COSTLY DRUGS"

The Treasury has made an Order under Section 20 of the Finance (No. 2) Act, 1940, entitled the Purchase Tax (Exemptions) (No. 2) Order, 1945 (S. R. & O., 1945, No. 1263), the effect of which is to exempt from purchase tax drugs specified in the first schedule to the Order (see below).

The exemption applies only to goods delivered on sale, or appropriated to retail trade or similar purposes, on or after October 20, 1945, or, in the case of imported goods entered with the Customs or delivered from bonded warehouse for home consumption, as the case may be, on or after October 20, 1945. No rebate of tax is allowed on goods in retail stock that have already borne the tax. Drugs exempted under the Purchase Tax (Exemptions) (No. 1) Order, 1941 (C. & D., 1940. II. 147), and listed on pp. 7–10 of Notice No. 78B, remain exempt. The effect of the new Order is to amplify and in some respects recast the list of exempted drugs. A revised Notice No. 78 B, incorporating in a single schedule all the exempt drugs, is shortly being issued. A copy is to be supplied to all registered traders likely to be concerned. should inform the officer of Customs and Excise of preparations which they claim are entitled to exemption under the Order and should consult the Commissioners, through the local officer, in any case of doubt.

#### Exempted Drugs

The following are the drugs newly exempted from purchase tax:—Perfumed ethyl chloride; vinyl ether; acetarsol, salts thereof and preparations containing not less than 9 per cent. by weight of acetarsol or the equivalent thereof; any one of the following substances, prepared for use by injection: Bismuth and compounds thereof, mercury and salts thereof; the diethylamine salt of 5:5-diethylbarbituric acid and the diethylamine salt of 5-allyl-5-isopropylbarbituric acid prepared together for use by injection. (Unperfumed ethyl chloride is already exempt from purchase tax.)

Preparations consisting only of phenothia-zine and one or more of the following things, namely, an excipient, vehicle, base or preser-vative. (Phenothiazine by itself is already

exempt from purchase tax.)

The following substances, and preparations consisting only of one of those substances and one or more of the following things, namely, an excipient, vehicle, base or preservative: Compounds whereof the sole constituents are insulin, a protein other than protamine and zinc; hormones produced from the anterior lobe of the pituitary gland, the following: growth hormone, thyrotrophic hormone, lactogenic hormone, gonadotrophic hormone, and combina-

tions of any two or more of those hormones; esters of stilbæstrol, esters of hexæstrol. dienœstrol and esters of dienœstrol; methyltestosterone, and esters thereof; chorionic gonadotrophin (equine); calcium boroglucochorionic nate; 4:41 diamidinodiphenylether di-(8-hydroxyethanesulphonate); the dimethylcarbamic ester of any 3-hydroxyphenyl-trimethyl-ammonium salt or of any 3-hydroxyphenyl-trimethyl-ammonium alkyl salt (other than the methyl sulphate); sym-diquinolyl-6:61-carb-amide-1:11-bismethylmethosulphate. (Insulinprotamine-zinc, and the dimethylcarbamic ester of 3-hydroxyphenyl-trimethyl-ammoniummethyl-sulphate are already exempt from pur-

The following substances, and preparations consisting only of one of those substances and one or more of the following things, namely, an excipient, vehicle, base or preservative: Amethocaine hydrochloride; bismuth tryparsamide; α-butyloxycinchoninic acid diethylethylene-diamide, and salts thereof; dihydromorphinone, and salts thereof; 3:4-dihydroxy-1-(α-hydroxy-β-aminopropyl) benzene hydrochloride; ephedrine, and salts thereof; hyoscine, and salts thereof; esters of morphine, ethers of morphine, and salts of any such esters or ethers; nikethamide; oxyphenarsine, and salts thereof; penicillin salts as defined by paragraph I of the Schedule added by the Therapeutic Substances Amendment (No. 2) Regula-tions, 1944 (made under the Therapeutic Sub-stances Act, 1925), to the Therapeutic Sub-stances Regulations, 1931 (so made), as in force at the date of this Order; pentose nucleotide, and salts thereof; pethidine hydrochloride; sodium aurothiomalate; sodium aurothiosulphate; the sodium salt of 1-methyl-5-allyl-5-isopropylbarbituric acid; the sodium salt of 5-ethyl-5-(y-methylbutyl)-thiobarbituric acid; the sodium salt of 5-42-cyclohexenyl-5-allyl-thiobarbituric acid; tryparsamide. Preparations consisting only of two or more

of the following substances, whether with one or more of the following things, namely, an excipient, vehicle, base or preservative, or not: (a) the substances specified in the preceding sub-paragraph; (b) pituitary (posterior lobe) extract as defined by paragraph 1 of the Fifth Schedule to the Therapeutic Substances Regulations, 1931 (made under the Therapeutic Sublations, 1931 (made under the Therapeutic Substances Act, 1925), and other preparations of the posterior lobe of the pituitary gland; (c) the substances specified in the Schedule to the Purchase Tax (Exemptions) (No. 1) Order, 1941, in the entry containing a list beginning with the word "Adrenaline" and ending with the words "The sodium salt of 5-ethyl-5-(2-methylbutyl)-thiobarbituric acid" (the effect of this paragraph is twofold. It adds to Group of this paragraph is twofold. It adds to Group III set out on p. 8 of Customs Notice No. 78B, dated September 1942, the substances specified in sub-paragraph (1), and it transfers to that Group, from Group II so set out, pituitary (posterior lobe) extract); other than preparations specified in the Schedule to the said Order

of 1941.

Preparations consisting only of one of the ollowing substances and any aminoacridine avine, whether with one or more of the followng things, namely, an excipient, vehicle, base r preservative, or not: Para-aminobenzeneulphonamide, salts of para-aminobenzeneulphonamide, derivatives of para-aminobenenesulphonamide having any of the hydrogen toms of the para-amino group or of the sulhonamide group substituted by another radial, and salts of such derivatives. (Para-aminoenzenesulphonamide and certain preparations ntaining that substance, certain derivatives hereof and salts of certain derivatives thereof, eing preparations not containing an aminocridine flavine, are already exempt from urchase tax.)

Derivatives of hydroxy-mercuri-amino-proane, derivatives of hydroxy-mercuri-aminoropylene, and preparations consisting only of derivative of either of those substances and ne or more of the following things, namely, a excipient, vehicle, base or preservative or

neophylline.

Preparations of stomach containing the hæmopoietic principle thereof in a concentrated form and preparations consisting only of any such preparation of stomach as aforesaid and one or more of the following things, namely, an excipient, vehicle, base or preservative, a salt of iron or a vitamin of the B complex (but not including desiccated stomach or preparations consisting only of desiccated stomach and one or more of the following things, namely, an excipient, vehicle, base or preservative). (Desiccated stomach and preparations of desiccated stomach with an excipient, vehicle, base or preservative, are already exempt from purchase tax; and under the new Order will also be exempt when mixed with a salt of iron or a vitamin of the B complex.)

Therapeutic substances intended to be used solely for veterinary purposes, if prepared for use by injection or by application to the scarified skin, the following: Bacillus coli serum; Coryne pyogenes toxoid; staphylococcus toxoid; struck vaccine; swine-fever (crystal violet)

vaccine.

#### PROPRIETARY ARTICLES TRADE ASSOCIATION

HE quarterly meeting of the council of e Proprietary Articles Trade Association as held in London on October 11, the resident (Mr. R. Peck) in the chair. THE ECRETARY submitted a letter from Mr. T. Hall, Ph.C. (representative on the uncil for Southall Bros. & Barclay, Ltd.), ating that, as he was retiring from busiess at the end of the month, he would ase to attend the council meetings. On e motion of the president, a resolution cording the council's appreciation of Mr. all's services as president of the Associaon and as a member of council, and shing him health and happiness in his tirement, was adopted.

#### ouncil Election

The council decided that, for 1946, four ats in each section should be filled by ection, the seats being those which, by tation, would have been filled in the ars 1940 and 1943 had elections been The members who retire and are gible for nomination and re-election are: nufacturers' section, Thos. Christy & ., Ltd., Foster-McClellan Co., Horlicks, d., and Newton, Chambers & Co., Ltd.; olesale section, Ayrton, Saunders & ., Ltd., Thos. McMullan & Co., Ltd., times, Clark & Co., Ltd., and Sangers, d.; retail section, Messrs, S. W. Hague. S. Howells, T. Marns, and P. F. Rowsell. The council approved arrangements made the secretary for resuming, at an early te, the use of 43 Gordon Square as the ice headquarters of the Association.

The Secretary reported that, following a decision reached by the council in July, he had sent an invitation to join the P.A.T.A. to a number of toilet and perfumery preparation manufacturers not at present, members of the Association. A number had applied for membership and others had the matter under consideration.

#### Wholesale Matters

Four applications for membership of the wholesale section were considered and not accepted. A number of applications from traders desirous of recognition as wholesale distributors of P.A.T.A. goods were referred to the appropriate committee of the council for consideration. The council gave further consideration to certain aspects of wholesale distribution and decided to continue discussions at the next meeting.

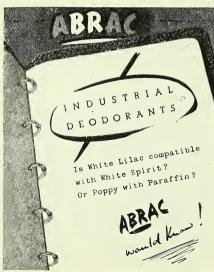

#### Price-maintenance Work

The report on price-maintenance work was approved. It stated that, during the previous quarter, 283 calls and inspections had been made by the Association's representatives, and that in four cases only had there been evidence of price-cutting. During the period, 118 test purchases had been made. With few exceptions, stocks of P.A.T.A. goods held by dealers whose names were still on the stop list were extremely limited. Investigations of complaints that certain co-operative societies were allowing dividend with sales of P.A.T.A goods had been made, and suitable action had been taken or was pending.

#### Birdsgrove House

RM approval and high commendation greet the decision of the Pharmaceutical iety's Council (C. & D., October 13, 372) to convert into a convalescent ne for pharmacists the Society's ware quarters at Birdsgrove House, Ashrne, Derbyshire. The scheme, put vard by the Benevolent Fund Comtee, has been ratified by the full Council, it is expected that the first patients or sts will be able to make use of the he in the late spring. Mr. McNeal, as irman of the Committee, was responsible piloting the proposals through the ncil, and it may well be that a grateful terity will have more cause to remember name in this connexion than if he had ared the coveted presidency of which he deprived in such obscure circumstances une last. As between the two alternas of a convalescent home and an litution for aged pharmacists, there be general agreement that a wise ice has been made, particularly in the ditions that exist today, although it well prove that at first there will be igh proportion of elderly pharmacists ong the convalescents who make use he home.

s has been pointed out, there are many erly pharmacists who have had to alder a heavy burden at the very time which they might normally have expected

to take life a little more easily, and among these there will be a number whose health has suffered in the process. It would come as no surprise to us if there proved to be little opportunity for a year or two to accommodate husbands and wives of those visiting the house, though, of course, it is the intention to go so far as possible in this direction.

#### Overwork and its Results

Mr. McNeal expressed some doubt as to the extent of the demand, but it may be pointed out that the warnings, given publicly by the chairman and secretary of the Central Pharmaceutical War Committee, about a possible breakdown in the civilian pharmaceutical service in the coming months are certainly not idle or ill-considered words. A further letter from Mr. Young appears on p. 416. The misfortune of two Bournemouth pharmacists (see p. 394) in being prosecuted for failure to make certain entries in a register, was generously regarded by the magistrate, who dismissed the charges under the Probation of Offenders Act. One of the pharmacists, an employee, was absent through illness brought about by overwork, and the other, his employer, was only contriving to keep abreast-or nearly abreast-of the work by carrying on until midnight on most evenings. That is just one example that has come to light. Everywhere pharmacists are working at a pressure which takes severe toll of their health at the same time as it deprives patients of the margin of safety to which they are entitled. If the Bournemouth defendant's error had been in dispensing rather than in clerical work the consequences might have been serious indeed. Accuracy in dispensing is so much taken for granted today that no allowance is made by the authorities for the possibilities of errors arising from fatigue. The penalty for errors is borne jointly by the public and pharmacists concerned. The real responsibility lies where the Society's president has publicly proclaimed it to rest: on the shoulders of the Ministry of Labour. So long as there is no equity in the distribution of the pharmaceutical burden—and there is no equity when a

qualified assistant is subject to full direction and a "manager" is free to seek employment in the most remunerative and least overburdened areas-so long will breakdowns occur.

For the human victims the Council has made imaginative and magnanimous provision at Birdsgrove House. The Benevolent Fund, and not the Government, is paving the cost. All pharmacists will devoutly hope that, at the end of three years, when the subject comes up for reconsideration, there will be insufficient ill-health among members of the Society to warrant continuance of a convalescent home. present outlook offers little hope that such will be the case.

#### The Drug Trade Abroad

FOR many years THE CHEMIST AND, DRUG-GIST has provided, under the title of "Commercial Notes," informative paragraphs derived from sources all over the world, relating to drug trade matters of a business character. With the advent of the war and the consequent closing down of many normal channels of communication, "Commercial Notes" became of necessity a much attenuated version of a formerly useful service. It has now become possible not only to revive this C. & D. feature, but to extend its scope very considerably, with the object of reporting details of post-war drug trade developments in all parts of the world. Arrangements have been made to add to the usual sources of information formerly utilised in connexion with "Commercial Notes," the world-wide service of trade and industrial news provided by the Reuter's news agency. These and other up-to-the-minute commercial reports will be incorporated in a regular feature in The CHEMIST AND DRUGGIST under the title of "Overseas Trade News" (see p. 412). Only matters of a commercial nature will be dealt with in this section. In the belief that a weekly survey of commercial conditions in the United States drug markets will prove of interest to our readers, arrangements have also been made by The Chemist AND DRUGGIST to provide this further service as part of the weekly Trade Report. The first survey appeared in last week's issue (p. 387). Comments received from

trade quarters indicate that the innovahas been well received and will prove of v

#### Hot-water Bottles by Pos

RECOVERY of postal charges by distribution of rubber hot-water bottles who are ob to send single bottles by post against to the receipt of a medical certificate is the su' y and of a communication received from the s tary of the Central Price Regula 1 Committee. The notice states that, in the states that, in the states that the states the states that the states the circumstances, no objection will be t in future to the recovery by the whole of the actual postage paid by hir mind addition to his permitted profit marg 17.65 per cent. on cost. Nor will will. objection be raised to the recovery retailer from his customer of actual pos paid by the retailer to a wholesale addition to the permitted profit marg 42.85 per cent. on cost.

The concession, it should be noted, ap only where single bottles are packed ling posted by a wholesaler to a retailer, which the additional sum recoverable is limited and for the actual postage paid. No additing maken amount may be charged for packing, which must be met out of the profit me allowed as contemplated by the Ru
Hot Water Bottles (Maximum Pr Order, 1945 (C. & D., September 22, p. Day in th Where a wholesaler dispatches more one bottle in a parcel to a retailer, whe ray in or not against a medical certificate, he treat the transaction as a normal par allow his business and price the goods by refer to the permitted profit margin only, no addition for postage.

#### Oiled Artificial Silk

THE Council of the Pharmaceutical South the has approved the following modification property the description for oiled artificial silk, which subscribers should amend their copy of states monograph in the British Pharmaceu Codex accordingly:-

SERICUM OLEATUM FACTITIUM Page 24 (Sixth Supplement), Line 6 Delete "of 70 or more filaments and.

When oiled artificial silk, B.P.C. Pless prescribed or demanded, oiled artificial complying with the amended descrip may now be dispensed or supplied.

#### PHARMACEUTICAL SOCIETY OF IRELAND

le seventieth annual meeting of the naceutical Society of Ireland, held in 1 on October 8, members were ind by THE PRESIDENT (Mr. C. J. n) that membership figures had d a new high record.

the outset, the report of the scrutinthe ballot for the recent election was tted; it showed that of the 810 papers sent out, 574 had been ed, of which two were disallowed, several were received too late for the

Amidst applause THE PRESIDENT ed Messrs. J. K. Whelehan, M. loe, J. P. Kissane, W. G. Cunningham, Scott, P. Brooke-Kelly and R. Daly 1.

is address to the meeting Mr. CREMEN This meeting shows the active interir members take in the Society. dealing with the general report, I tulate Mr. Daly on his election; I am e will follow the high standards set predecessors from Cork. It is again ivilege to congratulate and thank the olent Fund Dance Committee, under le chairman (Mr. T. Gleeson), on a ficent contribution to the Benevolent -the record figure of £390. There little hope of new legislation for acy in the near future. The Council urally impatient at the delay, cong the glaring injustices taking place the 1908 Act throughout the country, ould appreciate detailed information members where the law is broken. ear I referred to action taken by the he acceutical Council, in conjunction it the Committee of the Irish Drug ation, to protect the interests of Irish sts in the distribution and sale of hary preparations. There is now only are anufacturing firm with which we have satisfactory arrangement. In conclusion with to pay tribute to Mr. J. K. and han (vice-president), Mr. P. C. Cahill tre irer) and all my colleagues on the or il, for their assistance, loyalty and o-cration during my terms of office, to include err (registrar) for his guidance and the left to Miss Hyland for her courtesy, and r Press representative (IMI).
for his capable and accurate reports,
THE CHEMIST AND DRUGGIST and
Chemist and Druggist" for the artifund en us way they have treated us despite paper restriction. (Applause.)

MR. M. G. Murphy, Mitchelstown, proposed adoption of the president's address. He only hoped that president and Council would succeed in doing what they had been trying to achieve in the last couple of years with regard to veterinary preparations. Mr. J. J. Roche, seconding, thought all would agree that Mr. Cremen had filled the chair with dignity and capability. The president had made a particular study of apprenticeship, and he trusted that when he left the chair he would keep his mind on that problem. The Registrar (Mr. J. J. Kerr) then put the motion to the meeting and it was carried with acclamation, the president acknowledging.

MR. P. C. CAHILL, presenting his report as treasurer, said that, on the income side of the Revenue Account, subscriptions for the year ended August 31 came to £1,268, an increase of £117 over the previous year. There had been an increase in the number of apprentices, and preliminary registration fees for the year totalled £768, against £667 in the previous year. On the expenditure side, salaries and wages, at £1,098, showed a big jump of £145, and payments for the journal, at £502, showed an increase due to increased membership. Total expenditure was £2,897, an increase of £459. The amount written off premises was £500. That gave a surplus for the year of £445, against £678.

#### Hint of Increased Fees

On the revenue side, cash in hand was up from £46 to £51, and cash in bank up £400; that money would be invested in the near future if they could get suitable securities. On the whole it was a satisfactory year, although the surplus was not as large as in the previous year. Expenditure during the past four or five years had shown a marked increase, and there was no hope of a decrease. On the contrary, they might have to face further substantial increases in the next four or five years, which could only be met by an increase in the annual subscription of members. It might be said that they had a large reserve, but he felt that might be required for another purpose. When the cost of the journal was taken off their present subscription of 31s. 6d., it left £1 is., which was the lowest professional fee in Ireland. He thought that members would not object to paying an annual fee of £2 2s. or £2 10s., but doubted whether the Council would take any action in the matter until it had ascertained members' views. The present building,

which they had occupied for a number of years, was becoming too small, and they must look for alternative accommodation. They could do with a large, up-to-date, well-equipped laboratory, and they had no large meeting room. They also wanted accommodation for their student representative body and various athletic clubs. They might have to look around for alternative accommodation, and to consider whether to buy or to build. If they thought of buying the difficulty was to get a central building with all the accommodation they required. It was quite on the cards they might have to build. It might be suggested that they should approach the Government for assistance. On the other hand, if they received Government finance it might bring with it Government interference.

#### "Good Reading"

Mr. T. R. Bourke, moving adoption of the treasurer's report and statement of accounts, said the statement made good reading, but it was rather disappointing to find that some eight hundred licentiates were not members of the Society; he thought compulsory membership was the answer. Mr. Cahill had mentioned that an increase in members' subscriptions might be necessary, and he thoroughly agreed.

MR. LYALL G. SMITH (president, Irish Drug Association), seconding the motion, said he agreed that, when the membership was only 783 out of a possible 1,631, every effort should be made to increase it. He did not think the suggested increase in subscriptions was unreasonable. The present premises had gradually become outgrown in their usefulness, but if they were to get new ones he would like to see them acquired without Government interference or control. During the past year the Irish Drug Association had been pleased to co-operate with the Society, and for the valued help his Association had received from members of the Council he wished to express their appreciation.

MR. FRED STOREY, Belfast, said that the times they were passing through now were as difficult as, if not more so than, during the war. He paid tribute to the president for his address, and to the treasurer for his balance sheet, of which he had every reason to be proud. More licentiates should become members of the Society, and more druggists associates, if only out of recognition of the great work being done on their behalf by the Society. In the North they had already some post-graduate courses, and there was a clamour for more.

Mr. David Murphy said that, in he view, the teaching in the Society's schowas obsolete. They should have a class theoretical as well as practical pharmac It was no longer important to know he to make pot. permang. pills, but it wimportant to know what drugs were, which were for, and how they were use Regarding the £94 paid in income tax, it was paid on fees received from studen then it was time to reduce the fees.

Mr. Seamus Murphy expressed agreement with the previous speaker. At the rear of the present premises, he said, the was not sufficient room for bicycles, at many had to be parked out on the street the cloakroom accommodation was all insufficient.

MR. G. H. BATT asked what were t powers of a qualified assistant, and he long he could remain in charge of a she but the President thought it unfair raise a legal matter of that kind, whi was really one for the Society's law advis It was generally accepted that the qualifi

was really one for the Society's law adviss It was generally accepted that the qualificassistant could act during the "tempora absence" of the chemist. He did not this there had been any decision on the meani of "temporary absence."

Mr. Batt went on to cite a case in whi he alleged that a qualified assistant wrunning a shop for five years and had be actually training an apprentice for over year. The President said these we serious statements to make. If the fawere sent in to the Council and substatiated, action would be taken. Frequen when the Council went to investigate coplaints the charges made were not stantiated.

#### Loss on Prosecutions

Mr. Cahill, replying to a number queries put by Messrs. M. Leonal D. Murphy and others, pointed out that item of £2,694 for Bank of Ireland sto in the balance sheet represented a purcha of £769 worth of stock. It was true tl the Society collected some of the fines a expenses in law cases, but frequently the did not cover all the expenses involve Every year there was a loss on prosecution taken which had to be met by the Socie The question of income tax was an claim against them, which went back eig or ten years. About nine professional bod like their own were awaiting a decision this matter, and he understood a decisi would be given before the end of the ye The treasurer's report was then una mously adopted.

#### nevolent Fund

Presenting his report on the work of the nevolent Fund, Mr. Cahill said that the ome was £539, against £465 in the vious year. This was made up of subptions, £32 (against £34); interest and idends, £103 (against £100); bank erest, £3 16s.; proceeds of dance, £391; l sundry receipts, £7 18s. Total outngs were £207, of which £200 was for nts to chemists' assistants, or their Grants ranged from single ounts of £5 up to a total to one indiual of \$40 spread over twelve months. plicants included elderly people, widows, ple anxious to get children educated, grants to cover costs of sickness and ial. This was easily the Fund's biggest r both for income and expenditure: y had helped every deserving case ught under their notice, but he felt there ht be some hard cases throughout the ntry, on which he asked for reports. estments stood at £3,061, and cash in lk at £623, which would be invested rtly. There was a balance on the capital ount of £3,634. Gradually they were ning up to the £5,000 mark set by the ple who originated the Fund.

R. J. J. KERR (registrar) mentioned t a number of chemists had adopted laudable practice of adding 10s. 6d. for Benevolent Fund to their subscription the Society, and had done so since the ndation of the Fund; he was glad to more were adopting that practice.

fr. D. Murphy, moving adoption of the ort, said that, as a member of the Dance mmittee, he could assure the meeting y were doing everything possible to e all they could for the Fund.

IR. C. COLLIS, seconding, expressed nks to those who had subscribed so erously. He paid tribute to members the Council, and particularly the presit, treasurer, and Mr. Whelehan, for value assistance. The report was adopted.

#### sentation of Medals

silver medals were then presented to s Margaret Jennings and Mr. Anthony ysius Patrick Toher, who, said the istrar, had both qualified with equal rks, and had both come within two rks of earning a gold medal.

HE PRESIDENT congratulated Miss nings on her great success. He was ry Mr. Toher, who was the son of a mist, was unable to be present. One miner assured him that he awarded Mr. ler 100 marks for one paper, a marking

the examiner had never given before in his long history as an examiner.

MR. J. GLEESON proposed a vote of thanks to the registrar for the capable and efficient manner in which he had discharged his duties during the year. MR. T. C. Scott seconded, and MR. F. Storey supported the motion, which was passed with acclamation. MR. KERR briefly replied, and the meeting terminated.

#### **EXAMINATION RESULTS**

The following satisfied the examiners in the Chemist and Druggist Qualifying examination held in England and Wales in October:—

Barnett, Sheila Margaret, Hull Bater, Winifred Amelia (Mrs.), Guernsey Bobart, Nancy Elisabeth, Oxford Brayne, Kathleen Alma, Cleveleys Brimblecombe, Victor Roy, Salcombe Burton, Douglas, Grimsby Clarke, Norman, Ilkeston Cooper, Joan King, Douglas Corcoran, Margaret Mary, Birkenhead Eastes, John Albert D'Este, Brighton Dix, Philip Arthur, Danbury Evans, Awstyn Eynon, Haverfordwest Evans, Gareth Wyn, Colwyn Bay Fidler, Margaret Ellen, Bristol Gittins, John Alexander, West Kirby Goss, John Hedley, Coventry Hampton, Alice Mary, Newport Pagnell Harrison, Gwyneth Margot, Nottingham Hobbs, Maurice George, Yeovil-Jones, Islwyn Evans, Resolven Langley, Joan, Bromborough Llewellin, Elinor Frances, Wallasey Long, Walter Edward, Leicester Marsden, Eileen, Chesterfield Melliship, Frank Kenneth, Ealing Miles, Alfred Raymond, Cheltenham Moore, Kenneth Addis, Eastbourne Murley, Fred, Plymouth Murray, Agnes I., Sheffield Oldcorn, Ernest W. #### EDINBURGH CONSIDERS THE TREND OF EVENING

(Concluded from THE CHEMIST AND DRUGGIST, October 13, p. 381)

After giving to members of the Edinburgh and South-eastern Scottish Branch of the Pharmaceutical Society his summary of the negotiations with the Ministry of Health over a national medical service, Mr. Hugh N. Linstead continued:

Another question we have to make up our minds about is whether we should try to get the financial side of the conditions of service settled before the Act passes through Parliament. We can quite well say that our attitude to any new Government proposals depends upon whether we are going to be paid adequately for the work we shall have to do, and we ought to know in advance what we are going to be paid. There is no reason why we should not talk about the new Act and terms side by side. I believe we have an opportunity now, when no Government can deny that they are revolutionising the conditions under which we are to carry on business, of getting the dispensing fee fixed on the basis of a professional fee not related to overheads and the cost of carrying on a business. On that sort of basis I believe we ought to claim very much nearer is, than 6d, for the ordinary medicine. I believe we ought to raise the question of proprietary medicines from the point of view that, if a Government is offering to the people of the country a 100 per cent. pharmaceutical and medical service costing a large sum of money every year, there is no justification for the daily papers and the hoardings telling the people of the country that they need not make use of the service the Government provides.

#### Control of Proprietaries

The proprietary medicine "ramp" is a thing in which we are participating, mostly unwillingly, and I think it requires a great deal of control. It can be tackled on lines which have not been advocated hitherto. There is a great amount of voluntary control going on at the present time. The Society has done a good deal of it. We have turned at least one man off the register because of the way in which he advertised proprietary medicines. I am on the advertising investigation committee of the Advertising Association, and we spend a good deal of time chasing "patent' medicine advertisers because of the claims they make. But voluntary methods can only deal with members of the various organisations. We can discipline members of the Society, the Advertising Association

can do a lot with newspaper member of the can do a lot with new member of the can do a lot with that Association, the Manufacturers' As ation can discipline its members. I be we might get a situation whereby Society, B.M.A., Advertising Associa and Manufacturers' Association could together and prescribe really strir standards of advertising and purity v them the Minister of Health could recommend to to the Treasury. Any medicine comparish with the standards could be free of The last thing is this: The Gove the new service the interests of Eng and Scotland and Wales are one. vital that Scotland does not come t understanding with the Departmen Health or England with the Ministr Health without our having definitely as on the step we are going to take.

#### Discussion

THE CHAIRMAN, in declaring the med open for discussion, said he had been ticularly interested to hear Mr. Linster mention of terms, because he had felt they could not possibly offer the Gov ment what they thought was wa without being told by the Government was walked the would be paid. He thought that it fee would be paid. He thought that if National Health Service were sufficient was good the trade in proprietary medical support of the did not to the service were sufficient was a support of the service was a support of the service were sufficient was a support of the service was a suppo would die a natural death. He did not t it would be wise for pharmacists who made profits on the sale of proprie medicines to become "reformed rakes": MR. LINSTEAD expressed disagreement Mr. Beattie's opinion that, if the he would would have been seen that the beautiful that th service proved effective, people would buying proprietary medicines. That said in 1910-11, when the National He Insurance Service came along, but it n happened. It gave instead a new leas life to proprietary medicines.

Mr. Somerville said the quality of service did not depend upon the statu the pharmacist and the apparatus in pharmacy, but upon the payment give the pharmacist and the money availwith which to do the work. The pa medicine business had been a thorn in the western flesh, aggravated by the fact that pat medicines were a valuable export. Government at the moment, with national that finance as it was, would face up to the of doing the dispensing through any ot method than the chemists' shops.

MR. BATEMAN said that, when a priv chemist employed a qualified pharma sare his dispensing, there was one economic with which he was concerned, i.e. to he employee pharmacist a living wage, is dispensing done satisfactorily, and a little profit. He had reckoned that harmacist dispensed not less than 200 iptions per week and was paid a ercial wage of £7 to £8 a week, and nployer received is. per prescription professional fee, apart from profit on the employer would be making a profit of from 15 per cent. to 30 per and the employee would be receiving ent wage for his job. If they could the Government that they could dismedicines with the facilities they had sent at a cost less than would be reto fit up dispensaries, that was the est point they had. It would be imle to prevent the public from using edicine they wanted, even if it was of , but the position could be remedied setting-up of a committee as sug-by Mr. Linstead. He would go r than Mr. Linstead and suggest that egistered and qualified pharmacists be allowed to sell proprietary medi--Mr. Linstead said Mr. Bateman's ice to having a pharmacist at the sing counter, leaving the proprietor look after the commercial running of op, implied the possibility that two acists per pharmacy would be normal. they reached the stage where there two pharmacists to each pharmacy vould not be able to give a first-class Such staffing could only be proif the remuneration from the State ufficient.

Wilson said Mr. Linstead had visulis that there might be the professional s tinct from commercial pharmacists. Ve they then going to have two standards mination?

Anderson said Mr. Linstead's per that night had been heartening. He id t see that the pharmaceutical work in t new health service could be carried in hout the pharmacists of the country. The were worthy of their hire and calcula-ion along the lines instanced by Mr. at an were the minimum upon which

he hould agree to co-operate.

Welsh said that every proprietor ha acist had one dream in life-to emnother qualified man—and if this new Service scheme gave them terms ould enable them to do that, they welcome such a scheme with open As a result of the war most pharwere now closing at a reasonable

mac

hour. If the dispensary in a health centre were open after the private chemists' closing hour, what would be the effect on the policy of free choice of chemist? In the terms which would be drawn up he hoped that attention would be given to the hours of service.—Mr. Linstead replied that if the dispensary at the health centre remained open after the private pharmacy had closed the private pharmacy was, to that extent, out of action. The only solution, of course, was to have two pharmacists in each pharmacy so that they could take turns of late

duty. Mr. Drummond thought they should try to get a completely fresh approach to finance. At present the way in which they were paid was far from scientific. were paid only when doing the job, not for being in the pharmacy and keeping the premises open. Did they in this country pay a policeman only when he was running somebody in? The growth of the national daily Press and big finance in "patent" medicines had meant a huge increase in the commercial side of the business and yet, at the same time, the course of training for pharmacy had become increasingly arduous. In other words, the more scientific he became the less opportunity did the pharmacist have of practising his calling.

Mr. Hedderwick thought they should concentrate on unification of price lists for all Scotland.

Dr. Tait said, in reference to Mr. Welsh's remarks as to hours of service, that he had been trying to help members in a certain area by pointing out to the doctors, some of whom had wanted the chemists to work longer hours, that in the great majority of cases the medicine ordered at an evening consulting hour was not urgently required and could wait till the next day. Ministry of Health could do a lot to limit the use of proprietaries by educating the public. This would be better than attempting to interfere with the liberty of the public in procuring proprietary medicines. He thought they would find that the old tag about "prescribing by the doctor and dispensing by the chemist" would stand as strong in the coming service as in the past.

MR. MATHIESON said that if they were given a sort of retaining fee, there was a danger that the Government would have more control over them, and MR. LINSTEAD replied that they might have to be prepared for that contingency. They must be prepared to go in for the new scheme wholeheartedly; they would be given five years to prove they could "deliver the goods."

#### **OVERSEAS TRADE NEWS**

United States Mercury Production.—From January 1, 1940, to January 1, 1945, the United States mined 223,000 flasks of mercury.

Sulphonamides in Palestine.—It is reported that sulphonamides have become decontrolled in Palestine after a period of two-and-a-half years of restrictions.

Brazilian Angico Gum.—Angico gum, obtained from indigenous trees, has entered the Brazilian market. The gum is stated to be similar to gum acacia, but its uses are limited by the fact that, when in solution, it assumes a red colour.

Chinese Take Over Japanese Chemical Works.—United States sources report that China will inherit a large modern chemical industry from the Japanese. Chemical factories near Peiping and Tientsin are reported to have escaped from the war.

United States Carnauba Wax Prices.—The United States Office of Price Administration announces dollar-and-cents "ceiling" prices, effective from October 10, for "pure filtered carnauba wax," a new type of Brazilian refined wax. The ceiling prices are 71½ cents per lb., f.o.b. port of origin on purchases, and 85 cents per lb., f.o.b. U.S. port of arrival on domestic sales by importers.

Middle East Trade Conditions.—Egypt received higher imports from the United Kingdom during September, including industrial chemical products. Following rumours of the Sudanese Government's intention to abolish import licences over a wide range of goods, the market there has been in a state of expectancy, with buyers holding off pending an official statement. Prices of imported goods have remained steady, although the turnover was noticeably smaller than during the preceding month.

Brazilian Citrus Oil Production.—Brazilian chemical manufacturers consider the citrus oil industry in the State of Sao Paulo to have many unexploited possibilities, and point to the recent striking development of the mint and menthol industry. Sao Paulo is also experimenting with vetivert, lemongrass and geranium cultivation, and substantial quantities of the first two oils are being produced. Many of Brazil's sources of essential oils and resins have not yet been commercially utilised. For example, the large pine woods in the States of Parana and Santa Catarina, if developed, could provide a new source of wealth.

Russian Vegetable Oil Production.—message from Moscow states that the output of vegetable oils in the Soviet Union has been greatly expanded to compensate for the lack of animal fats. In 1940, the of extraction industry processed 705,000 tor of vegetable oils. During the war, twelven new oil-processing plants were built in the Eastern region, and up to January 1, 1942 plants with a daily capacity of 8,600 tor of oil, which had been in zones occupied be the Germans, had been restored. In the restoration of oil crops, Krasnodar and Staveropol Krais in 1944 attained their pre-wallevels, and the Ukraine has already greatly surpassed the 1940 level.

U.S. Chemical Output Doubled.—Output of chemical and allied products in th United States increased by approximatel 90 per cent. between 1939 and 1944, owin to war-time demands for munitions, med cinal products and insecticides. Productic of chemicals from 1942 to 1944 was value at \$21,700 million. Considerably increase needs for synthetic rubber raised industri alcohol production in 1944 to 400 per cen above the pre-war rate. Production plastics and resins during 1944 amounted to \$332 million, against a 1939 output \$78 million. More than 2,000,000 lb. DDT has been produced since August 194 Penicillin output has increased during th past three years to the present figure 600,000 million units monthly.

Sunflowers in Russia.—The sunflower an important oil-producing crop in Sovi Russia. Eleven years ago, when working experimental station No. 8281 in the Do District, Leonid Zhdanov produced a sur flower that he named after the station. was found to be resistant against broon rape, the sunflower's worst enemy, and ale against drought. Its yield was more that three or four times greater than the ordinar sunflower. A year after Zhdanov had con pleted his field trials it was sown on 5,00 Today it covers 21 million acre acres. When the Germans invaded the Doi Zhdanov managed to get his seed stock ar laboratory equipment to safety and cor tinued his work. Now he has produced sunflower called "Steppe." In addition having a higher oil-content it has an earlie ripening date. This is important, for the sunflower harvest in Russia precedes the planting of winter wheat and late ripenir varieties can hold up the sowing of this cre until the sowing time has been passed,

#### TRADE REPORT

pot quotations for pharmaceutical chemicals, crude drugs and essential oils represent the ices for wholesale quantities of standard quality. C.i.f. quotations do not include exceponal marine risk insurance and other abnormal charges payable under present conditions

#### 28 Essex Street, W.C.2, October 17

HE slight improvement in most markets ted last week is being maintained, though isiness could hardly be described as ore than routine. In addition to their ore usual difficulties, merchants have w to contend with problems engendered the widespread docks strike, which lds up export business and keeps badly inted supplies out of circulation. Prices ve generally kept their firm tone and, in few instances (e.g. CARDAMOMS, CLOVES, JM ACACIA and WAXES) are even showing tendency to rise. The PHARMACEUTICAL IEMICALS markets are attracting a fair nount of attention, but here again the phasis is on steady routine trade, with outstanding features. In a communicaon dated October 10, makers of Bromides nounced an advance in prices, the st change in the price position since 1943. evised schedules are issued for COMPOUND SMUTH POWDER, N.F., LIGHT and HEAVY GNESIUM CARBONATES, LIGHT MAGNESIUM IDE and MAGNESIUM TRISILICATE, the anges in all instances being due to the corporation of new packing charges. nilar revisions are being made in CITRATES d Iodides, but details are not yet availle.

#### ude Drugs

While a steady consuming business ntinues in available Crude Drugs, ere is little of special interest at the oment; values are generally well mainned and, in a few instances, higher ices are quoted. Offers of small parcels Cape Aloes are reported. There is ther more difficulty in buying CARDAMOMS the last-mentioned prices. Some CHERRY RK has just been landed from New York, t the quantity is small. Sound Ergot nains at the higher price noted last week. M ACACIA is rather dearer. Cloves and ner Spices are in better demand, and tone of the market is firmer. NUTMEGS nain in short supply. Candelilla wax unobtainable.

#### sential Oils

There is again no change to record in s section, and business in oils outside control scheme is negligible.

#### U.S. Drug Market Report New York, October 12

BRIGHT prospects for the American chemical industry are forecast by the Department of Commerce in a review of the current situation and future outlook. Reduction in military demands has eased considerably the Fats and OILs supply picture. About 400 drums of crude GLYCERIN have arrived from Buenos Aires to help abate continuing heavy demand. Two million lb. of crude glycerin was purchased last year, and it is thought that the shipment may

be part of that purchase.

An arrival of Vanilla Beans from Madagascar, mentioned last week, is understood to have amounted to 2,650 cases. The same steamer is reported to have carried a cargo of about 120 drums of YLANG-YLANG, 250 drums of CLOVE OIL, 200 drums of GERANIUM and about fifteen drums of Vetivert, but arrivals of these items generally are light. Fairly substantial lots of CLOVES from Zanzibar were also received, reports placing the total at 24,000 bags. More GALBANUM is available. Domestic collections of IRISH MOSS have been light, but small lots of imported moss are reported afloat, likely to be available at 33c. to 35c. per lb. An additional four tons of OIL OF BERGAMOT is being offered to dealers by the Government at \$7.88 per lb., DIGITALIS and BELLADONNA LEAVES are in poor spot supply, while prospects for replacements of French Psyllium seed are considered uncertain.

After falling to the low point of \$90 per flask last month, owing to keen competition for the limited business about, prices of MERCURY are now steadier at a rise of \$3 per flask. It is understood that domestic producers in the United States have asked the Government for quick action in freezing a substantial proportion of the surplus supplies, in order to stabilise the prices. Menthol quotations in Brazil have advanced approximately \$1 per kilo over the past couple of weeks, and with no immediate threat of any competition from the Far East it is generally believed here that major interests in Brazil are endeavouring to obtain better prices for their material. The U.S. Office of Price Administration has exempted many botani-

cal drugs from control,

#### Crude Drugs

Aloes.—Offers of small quantities of Cape are coming over in the region of 95s. per cwt., c.i.f., U.K.

Antimony.—Little change is evident in this market. Demand is steady and prices unaltered. English minimum 99 per cent. regulus, £112 10s. per ton, delivered; 70 per cent. crude, for the home trade, £90.

Areca nuts.—Dealers are able to supply wormy material on spot at 85s. per cwt.

Balsams.—Canada, in small supply on spot, 12s. 9d. per lb.; Peru, unchanged at 8s. per lb. Tolu and Copaiba are unobtainable.

Belladonna.—English herb continues to be quoted at 4s. 6d. per lb. Indian root, testing

o·25 per cent., would be worth 2s. 3d. per lb., f available.

BISMUTH.—In steady demand at 6s. 3d. per b, for minimum 5-cwt. lots.

Buchu Leaves.—Small lots would be worth 5s. 3d. to 5s. 6d. per lb.

CARDAMOMS.—In small supply and difficult o buy at last-mention ed prices.

Cascarilla quills.—As noted last week, ome arrivals are reported; price is around s. 6d. per lb.

CHAULMOOGRA.—Hydnocarpus, on the spot, es. per lb., in tins in cases.

CHERRY BARK.—Small parcel just landed is riced at is. 7d. per lb.

CHILLIES.—Mombasa, spot, steady at 110s. er cwt.

CINNAMON CHIPS.—Quoted on spot at the nchanged price of 2s. 2d. per lb., ex store ondon.

CLOVES.—Firm at 1s.  $6\frac{1}{2}$ d. per lb., sellers, for anzibar; to arrive,  $10\frac{1}{4}$ d. per lb., c.i.f.

COCHINEAL.—Silvers, spot, 5s. 9d. per lb.

COCOA BUTTER.—Maximum official price is  $5.5\frac{1}{2}d$ . per lb., except for sales under licence.

COLOCYNTH.—Good pulp may be had from palers at 2s. 6d. per lb., spot.

DIGITALIS LEAVES.—Business quiet; prices 1changed. Portuguese, spot, 140s. per cwt.; nglish, 2s. 6d. per lb.

ERGOT.—Sound spot supplies continue to be noted at 7s. per lb.

GINGER.—West African, spot, 85s. per cwt. Gum acacia.—Firm conditions obtain with gher prices ruling. Kordofan cleaned sorts, ot, 76s. per cwt. London, 74s. Liverpool and s. Manchester; bleached, spot, 150s.; Talha, aned, 42s. 6d.

HENBANE.—Quiet and unchanged. Indian, ot, 250s. per cwt.; Egyptian (muticus), 85s. me Indian low-testing remains on spot at per lb.

Hydrastis Root.—Good demand, spot, 48s. r lb.

JALAP.—Material testing 12 per cent. is allable on spot at 4s. 6d. per lb.

Kamala.—From 2s. 9d. to 3s. per lb. is being ked for material testing 6 per cent. ash.

KARAYA GUM.—Indian No. 1 gum is offered spot at 210s. per cwt.

MALE FERN ROOT.—Indian root is available

spot at 77s. 6d. per cwt. Мемтнос.—Brazilian is offered on spot at

m 77s. 6d. per lb.

Mercury.—Maximum prices under the Conol of Mercury (No. 11) Order were given last

ek (p. 388). Myrrh.—Aden sorts of good quality is oted on spot at £18 per cwt.

Nutmegs.—In short supply at enhanced ces. West Indian, 80's, 3s. 10½d. per lb.; and unassorted, 3s. 7d.; wormy and broken, 4½d.

PEPPER.—Whole, not picked over or cleaned, on sale to processors, is officially priced at is. 4d. per lb. for white and is. per lb. for black.

PIMENTO.—Sellers on spot at is. 3½d. per lb. Quassia chips.—Spot, 39s. per cwt., ex store.

QUILLAIA BARK.—Spot, natural, 95s. per cwt.; cut, 110s.

SEEDS.—Quiet conditions obtain, with no quotable price changes. Current rates are as follows: Coriander.—Indian, none available, price nominal at 92s. 6d. per cwt.; Russian, fair amount here, but demand small, price 92s. 6d.; English, limited stocks, price 90s. to 95s. per cwt. Cumin.—Maltese, 150s., paid; Indian, none available. Dill.—London, 80s.; Liverpool, 80s. Fennel.—Supplies exhausted, nominal. Fenugreek.—London, 70s.; Hull, 70s.

SENEGA ROOT.—About 11s. per lb. will be the price of spot goods.

SENNA.—Alexandrian hand-picked pods are in good demand; price nominal at 4s. per lb. Good manufacturing Alexandrian pods, 2s. per lb. Tinnevelly leaves, No. 1, 10½d. per lb.; No. 2, 8½d.; No. 3, 6½d. to 7d.

Strophanthus seed.—100 per cent. Kombé seed, spot, 7s. 6d. per lb.

TRAGACANTH.—Medium grades are quoted as follows: No. 1, white, £130 per cwt.; No. 2, white, £115; No. 3, white, £100; No. 4, white, £85; pale leaf, £60; amber leaf, £56; dark bencher, £35; brown leaf, £25; red-and-brown leaf, £20; red leaf, from £17; hoggy, £12 to £15.

TURMERIC.—None available at present. Nominal value, 110s. per cwt.

Waxes.—Candelilla.—Spot, unobtainable; November-December arrival, one-ton lots, 232s. 6d. per cwt.; under one ton, 235s. per cwt.; landed terms. Carnauba.—Fatty grey, spot, 540s.; chalky grey, spot, 525s; prime yellow, spot, 625s.; medium yellow, 600s. Ouricum.—Spot, 320s. to 336s., according to quality; shipment, 285s., c.i.f.

#### Essential and Expressed Oils

Castor.—Official prices for bulk supplies are as follows: "Firsts," £82 per ton; "seconds," £80, both prices naked ex works.

CLOVE.—English-distilled oil is quoted at the unchanged price of 12s. 6d. to 13s. per lb.

COTTONSEED.—Controlled prices for bulk supplies are as follows: Crude, £52 2s. 6d.; washed, £55 5s.; refined edible, £57; refined deodorised, £58 per ton; all varieties are quoted naked ex works.

NUTMEG.—In short supply. English-distilled oil would be worth 55s. to 6os. per lb.

OLIVE (EDIBLE).—The price charged to the wholesaler by the importer is 25s. 9d. per gallon, ex store. Prices charged by wholesalers to retailers are agreed by the Ministry of Food as follows: 33s. 6d. per gallon, in 1-gallon loan cans; 34s. 3d. per gallon, in 1-gallon loan cans; 35s. per gallon, in 1-quart loan cans; 36s. per gallon, in 1-pint loan cans.

#### CORRESPONDENCE

Correspondents may adopt an assumed name, but must in all cases furnish their real name and address to the Editor

#### Eire Council Candidates' Thanks

SIR,—I would be grateful if you would convey—through the C. & D.—my very deep thanks to all those who gave me their votes and support in the recent election to the Council of the Pharmaceutical Society of Ireland.

Yours faithfully, Capwell, Cork. RICHARD DALY.

SIR,—Please give us space to offer our thanks to those members of the Pharmaceutical Society of Ireland who gave us their support in the recent Council election. To all the members we reiterate our assurances that their interests will lie safely in our hands. In our circular we stated our programme. This we shall follow faithfully and with confidence.

Yours faithfully,
M. Costelloe, W. G. Cunningham,
P. Brooke-Kelly, J. P. Kissane,
T. C. Scott, and J. K. Whelehan.
Dublin.

#### Herbert Skinner Memorial Fund

SIR,-You were kind enough to give publicity last season to the Herbert Skinner Memorial Fund. The fund has grown in proportion to the contacts made around the country with the various Branches of the Pharmaceutical Society and with local Unfortunately, our scheme Associations. from the North Metropolitan Branch was launched at the end of the season, and we would like to remind secretaries to bring it to the notice of members in the coming session. We also know that some of the Associations had difficulty in getting together during the black-out; we are now spared this unpleasantness and can meet together and find our ways homeward. There are in all branches of pharmacy (wholesale, retail and employee) many friends of the late Herbert Skinner, who, for fifty years, worked for all sections of the trade untiringly. No doubt these would like to have their names added to the list of contributors. We do not ask for moneys to disburse. All the cash available will be used to establish a permanent memorial in the form of furnishings for the British Pharmaceutical Codex Committee rooms in the new building at Brunswick Square. We appeal to all pharmacists in this country and to the

many friends of Herbert Skinner abroad to subscribe to the Fund so that a worthy memorial may be established to one who did so much for pharmacy. Subscriptions should be sent to the president of the Pharmaceutical Society (Mr. J. C. Young, Ph.C., 34 Bethune Road, London, N.16).

Yours faithfully,

T. C. NEVILLE BOOTH, On behalf of the Appeal Committee. London, N.

#### C.P.W.C. Recommendation Ignored

SIR,—Should the Ministry of Labour wait inactive while events drift to a crisis, it is quite probable that people will be unable to get the medicine that is prescribed for them during the coming winter. Briefly, the situation is that more than 300 pharmacists are needed to fill existing vacancies. The need is not a question of guesswork; it represents the number notified from all parts of the country to the Pharmaceutical War Committee specially appointed to advise the Government on how available pharmacists ought to be allocated between civilians and the Services The largest number of special releases which the Ministry appears likely to concede is 100-an inadequate allotment It is true that 400 pharmacists are to be released under "age and length of service" before the end of the year, but these mer will be free to go wherever they like. Only a few of them will be available for the vacancies that must be filled if a breakdown in the medicine supply is to be averted Many of the vacancies are in neighbour hoods—such as remote country places of the East End of London-to which demobilised man will refuse to go when he is free to choose. Obviously it is in the general interest of the community to maintain a service essential to the healtl of the community as a whole. If the Ministry of Labour refuses to maintain it, the responsibility is on them; but i does seem odd that they should ignor the unbiased advice of a committee o professional men and representatives o the Service departments set up by the Government to give it.

Yours faithfully, JAMES C. YOUNG, Chairman. Central Pharmaceutical War Committee. London, W.C.1.

#### 'PRONUTRIN'

Trade Mark

Brand

#### CASEIN HYDROLYSATE

## For Acute and Chronic Protein Deficiency

Supplies of enzymic digest of casein are now available and provide a readily absorbed source of nitrogen for the treatment of all cases conditioned by a protein deficiency. Containing all the amino acids necessary for human nutrition, 'PRONUTRIN' is indicated where there is inability to absorb, digest or ingest protein—for example—before and after severe surgical procedure; in ulcerative colitis and peptic ulcer; in infantile gastro-enteritis and dysentery; in chronic sepsis and burns and for tissue regeneration.

'PRONUTRIN' is obtainable as a palatable, soluble powder which can be dissolved in water, and flavoured to taste for oral administration.

Full details and literature will gladly be sent on request.

Available in tins containing 1-lb.
